Visual Inspection

Pre Start Checks and Safety

- ! Ensure correct sized nails/staples for the gun and job
- ! Ensure oil lubricator is full (if applicable)
- ! Ensure compressor is correct size to operate the gun
- ! Ensure correct air pressure for gun
- ! Use a compressor (do not use a bottled pressure system to operate the gun)
- ! Check worksite for hazards etc
- ! Do not adjust gun unless disconnected from air supply
- ! Check safety mechanism is operating correctly
- ! Do not tamper with the safety mechanism or other mechanical parts
- ! Do not engage in horseplay as the gun can inflict fatal injuries
- ! Ensure no other person is in direct firing line with the gun unit
- ! Ensure there are no hidden cables, pipes etc
- ! Check air hose for good condition

When Operating

- Set up compressor (as per compressor instructions)
- Load nails/staples into gun
- Firmly hold gun against timber to be nailed/stapled
- Pull trigger

Stopping and After Use

- Release trigger
- Disconnect air line
- Remove all nails/staples from unit
- Store gun away safely
